a
Human intestine, 57 regions
Median TV vs whole region
Fields sampled
solid: small intestine
dashed: colon
Random fields
Matched random cells
b
Design effects across organs, platforms and species (bars = medians)
Design effect D (cell types ≥1%)

Kidney DKD (obs. fields)
Kidney lupus (obs. fields)
Kidney GSE211785 (obs. fields)
Mouse kidney (whole)
Small intestine (whole)
Colon (whole)
c
Intervals vs truth
Cell Wilson
Ratio t
Quasi-binomial
Coverage of true proportion (3 fields)
Mouse kidney
Small intestine
Colon
d
Planning vs truth
Cell count
fovplan
fovplan 80%
fovplan 90%
Share within ±25% of truth
e
8 real donors
Cells χ²
Fields Wilcoxon
Fields quasi-bin.
Field model, clustered SE
Donors Wilcoxon
Donors quasi-bin.
filled: all fields
open: 10 fields/region
False-positive rate, random donor splits
